

Maths Curriculum 2014 - Year 1 Medium Term Planning

Unit 1.1: Numbers and Counting

Topic	Key Concepts	Strand	Notes/Non-statutory guidance
Number and place value	count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number	Number	<p>Pupils practise counting (1, 2, 3...), ordering (for example, first, second, third...), and to indicate a quantity (for example, 3 apples, 2 centimetres), including solving simple concrete problems, until they are fluent.</p> <p>Pupils begin to recognise place value in numbers beyond 20 by reading, writing, counting and comparing numbers up to 100, supported by objects and pictorial representations.</p> <p>They practise counting as reciting numbers and counting as enumerating objects, and counting in twos, fives and tens from different multiples to develop their recognition of patterns in the number system (for example, odd and even numbers), including varied and frequent practice through increasingly complex questions. They recognise and create repeating patterns with objects and with shapes.</p>
Number and place value	read and write numbers from 1 to 20 in numerals and words	Number	
Number and place value	count, read and write numbers to 100 in numerals; count in multiples of twos, fives and tens	Number	
Number and place value	given a number, identify one more and one less	Number	
Number and place value	identify and represent numbers using objects and pictorial representations including the number line, and use the language of: equal to, more than, less than (fewer), most, least	Number	

Unit 1.2: Money and Time

Topic	Key Concepts	Strand	Notes/Non-statutory guidance
Distance, Capacity, Time And Money	recognise and know the value of different denominations of coins and notes	Geometry And Measures	<p>Pupils use the language of time, including telling the time throughout the day, first using o'clock and then half past.</p>
Distance, Capacity, Time And Money	recognise and use language relating to dates, including days of the week, weeks, months and years	Geometry And Measures	
Distance, Capacity, Time And Money	sequence events in chronological order using language [for example, before and after, next, first, today, yesterday, tomorrow, morning, afternoon and evening]	Geometry And Measures	

Unit 1.3: Arithmetic to 20

Topic	Key Concepts	Strand	Notes/Non-statutory guidance
Addition and subtraction	add and subtract one-digit and two-digit numbers to 20, including zero	Number	Pupils memorise and reason with number bonds to 10 and 20 in several forms (for example, $9 + 7 = 16$; $16 - 7 = 9$; $7 = 16 - 9$). They should realise the effect of adding or subtracting zero. This establishes addition and subtraction as related operations. Pupils combine and increase numbers, counting forwards and backwards. They discuss and solve problems in familiar practical contexts, including using quantities. Problems should include the terms: put together, add, altogether, total, take away, distance between, difference between, more than and less than, so that pupils develop the concept of addition and subtraction and are enabled to use these operations flexibly.
Addition and subtraction	represent and use number bonds and related subtraction facts within 20	Number	
Addition and subtraction	read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs	Number	
Addition and subtraction	solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7 = ? - 9$	Number	

Unit 1.4: Measuring and measurements/Money and time

Topic	Key Concepts	Strand	Notes/Non-statutory guidance
Distance, Capacity, Time And Money	measure and begin to record the following: lengths and heights; mass/weight; capacity and volume; time (hours, minutes, seconds)	Geometry And Measures	The pairs of terms: mass and weight, volume and capacity, are used interchangeably at this stage. Pupils move from using and comparing different types of quantities and measures using non-standard units, including discrete (for example, counting) and continuous (for example, liquid) measurement, to using manageable common standard units. In order to become familiar with standard measures, pupils begin to use measuring tools such as a ruler, weighing scales and containers.
Distance, Capacity, Time And Money	compare, describe and solve practical problems for: lengths and heights [for example, long/short, longer/shorter, tall/short, double/half]; mass/weight [for example, heavy/light, heavier than, lighter than]; capacity and volume [for example, full/empty, more than, less than, half, half full, quarter]; time [for example, quicker, slower, earlier, later]	Geometry And Measures	

Unit 1.5: Recognising and naming shapes

Topic	Key Concepts	Strand	Notes/Non-statutory guidance
Properties Of Shapes	recognise and name common 2-D and 3-D shapes, including: 2-D shapes [for example, rectangles (including squares), circles and triangles]; 3-D shapes [for example, cuboids (including cubes), pyramids and spheres]	Geometry and measures	Pupils handle common 2-D and 3-D shapes, naming these and related everyday objects fluently. They recognise these shapes in different orientations and sizes, and know that rectangles, triangles, cuboids and pyramids are not always similar to each other.

Unit 1.6: Halves and quarters

Topic	Key Concepts	Strand	Notes/Non-statutory guidance
Fractions	recognise, find and name a half as one of two equal parts of an object, shape or quantity	Number	Pupils are taught half and quarter as 'fractions of' discrete and continuous quantities by solving problems using shapes, objects and quantities. For example, they could recognise and find half a length, quantity, set of objects or shape. Pupils connect halves and quarters to the equal sharing and grouping of sets of objects and to measures, as well as recognising and combining halves and quarters as parts of a whole.
Fractions	recognise, find and name a quarter as one of four equal parts of an object, shape or quantity	Number	

Unit 1.7: Position and movement

Topic	Key Concepts	Strand	Notes/Non-statutory guidance
Position and direction	describe position, direction and movement, including whole, half, quarter and three-quarter turns	Geometry and measures	Pupils use the language of position, direction and motion, including: left and right, top, middle and bottom, on top of, in front of, above, between, around, near, close and far, up and down, forwards and backwards, inside and outside. Pupils make whole, half, quarter and three-quarter turns in both directions and connect turning clockwise with movement on a clock face.

Unit 1.8: Clocks and time

Topic	Key Concepts	Strand	Notes/Non-statutory guidance
Distance, Capacity, Time And Money	tell the time to the hour and half past the hour and draw the hands on a clock face to show these times	Geometry and measures	Pupils use the language of time, including telling the time throughout the day, first using o'clock and then half past.

Unit 1.9: Multiplication and division using concrete objects

Topic	Key Concepts	Strand	Notes/Non-statutory guidance
Multiplication and division	Solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher.	Number	Through grouping and sharing small quantities, pupils begin to understand: multiplication and division; doubling numbers and quantities; and finding simple fractions of objects, numbers and quantities. They make connections between arrays, number patterns, and counting in twos, fives and tens.
